Total number of persons	0		0	0

Methodology for FL-517 - Hendry, Hardee, Highlands Counties CoC

Sheltered Population Total

1. What data source(s) was used to produce the total number of people included in the sheltered population (staying in an emergency shelter, Safe Haven, or transitional housing) on the night of the count? Please indicate the percentage of the PIT count derived from each of the sources. (If a source was not used, please enter zero).

HMIS Data	0%
Provider-level surveys	25%
Client-level surveys	75%
Observation	0%
Other	0%
Total	100%

2. Was the CoC able to collect information about the number of people being sheltered on the night of the count from all emergency shelters, Safe Havens, and transitional housing projects listed on the HIC or only some? listed on your HIC or only some?

- Complete census count

3. What information or method(s) was used to de-duplicate the count of the total number of people included in the sheltered population?

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number
- Comparison of unique client identifiers (not PII)
- Interview/survey question(s) with screening questions (e.g., have you already completed a count survey)

Sheltered Subpopulation

4. What data source(s) was used to produce the demographic and subpopulation data included in the sheltered population (staying in an emergency shelter, Safe Haven, or transitional housing) on the night of the count? (select all that were used)

- Provider-level surveys

- Client-level surveys

5. Was the CoC able to collect information about the demographic and subpopulation characteristics of all sheltered people or only some?

- All sheltered people

6. Looking at the change in your sheltered count from last year's count, please choose up to three reasons that best explains these changes from the drop down list below.

- Change in rapid re-housing capacity
- Change in homelessness prevention capacity
- Change in economic conditions (employment rate, etc.)

Please provide a brief description of these specific factors (500 word limit):

Due to the influx of ESG and State funding to be spent on RR and Prevention the population of families with children and single adults are both reduced.

Since the last hurricane (Irma) many families moved from this service area in search of assistance not being offered in this area, therefore this may have contributed to the reduction in overall homeless population.

Unsheltered Population

7. What approach(es) was used to count the total number of people included in the unsheltered population during the PIT count. (select all that were used)

- "Night of the count" - known locations

Point In Time Methodology for FL-517 - Hendry, Hardee, Highlands Counties CoC

- Service-based count

7a. Were certain areas within the CoC geography specifically excluded because the CoC had reason to believe there were no unsheltered people in those areas?

No

7c. In areas that were canvassed, did the CoC count all unsheltered people in those areas or a sample of people?

- All people encountered during the count

8. What information or method(s) was used to de-duplicate the total count of people in the unsheltered population? (Check all that apply)

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number
- Comparison of unique client identifiers (not PII)

Point In Time Methodology for FL-517 - Hendry, Hardee, Highlands Counties CoC

- Interview/survey question(s) with screening questions (e.g., have you already completed a count survey)

Unsheltered Subpopulations

9. What approach(es) was used to collect demographic and subpopulation data about unsheltered people included in the unsheltered population during the PIT count?

- Surveys/interviews of people identified as unsheltered on the night of the PIT count
- Surveys/interviews of people identified within 7 days following the night of the PIT count night who may have been unsheltered on the night of the PIT count (e.g., "service-based" surveys at locations where people who are homeless go for assistance)

10. Were all people who were encountered during canvassing on the night of the count or during post night of the count PIT activities asked to complete a survey/interview?

- All people encountered were surveyed

11. What information or method(s) was used to produce an unduplicated total count of homeless people across your sheltered and unsheltered populations?

- Comparison of personally identifying information (PII), such as name, date of birth, and Social Security Number
- Comparison of unique client identifiers (not PII)
- Interview/survey question(s) with screening questions (e.g., have you already completed a count survey)

12. Looking at the change in your unsheltered count from last year's count, please choose up to three reasons that best explains these changes from the drop down list below

- Change in rapid re-housing capacity
- Change in homelessness prevention capacity
- Weather

Please provide a brief description of these specific factors (500 word limit):

Due to the influx of ESG and State funding to be spent on RR and Prevention the population of families with children and single adults are both reduced.

Since the last hurricane (Irma) many families moved from this service area in search of assistance not being offered in this area, therefore this may have contributed to the reduction in overall homeless population.
